## **DETAILED ACTION**

### ***EXAMINER'S AMENDMENT***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with name on date.

The application has been amended as follows:

#### ***In the Claims***

- a) On line 1 of claim 25, "25" has been replaced with -24--;
- b) On line 1 of claim 29, "22" has been replaced with -24--.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on July30, 2003 has been considered by the Examiner and made of record in the application file.

#### ***Drawings***

The drawings are objected to because in *fig. 11*, it says *goto 1130 if Y and goto 1150 if N*. The correct flow should be *-goto 1150 if Y and goto 1130 if N-*. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office

Art Unit: 2609

action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Consider claims 1, the best prior art found during the examination of the present application, **Burgess, Jr. et al (U.S. Patent # 6449694)**, in view of **Karsi et al. (U.S. Patent # 7073079 )** clearly disclose and show a system for saving power (Burgess, Jr. et al. column 6, lines 40-47; abstract, lines 1-14) comprising:

a partial address (Burgess, Jr. et al. fig. 4 (440 & 450)) associated with a subset (Burgess, Jr. et al. abstract, lines 6-9) of the destination MAC address of a receiving station in the wireless network.

In the same field of endeavor, Karsi et al. clearly shows a wireless system (column 2, lines 54-58) and the physical layer (fig. 1 (145 & 185)).

However, Burgess, Jr. et., as modified by Karsi et. al., fails to show a PHY layer filtering protocol configured to generate and write the partial address into a PHY layer header portion of a frame of a sending station in the wireless network , or configured to read the partial address from the PHY layer header portion of a frame of the receiving station upon receipt of a data frame. In addition, Burgess, Jr. et., as modified by Karsi et. al., fails to show the receiving stations having the PHY layer filtering protocol determine at the PHY layer whether the partial address received in the PHY layer header portion of a received frame matches an internal partial address. Also Burgess, Jr. et., as modified by Karsi et. al., fails to show the receiving stations reject the received frame if the partial address in the received frame is a predetermined value.

Therefore claim 1 is considered novel and non-obvious.

Consider claim 18, **Burgess, Jr. et al (U.S. Patent # 6,449,694)** clearly disclose and show a system for saving power (column 6, lines 40-47; abstract, lines 1-14) as described.

However, Burgess, Jr, et al., fails to disclose a partial address associated with a subset of a destination MAC address of a receiving station in the wireless network; writing the partial address in a PHY layer header portion of a data frame.

Therefore claim 18 is considered novel and non-obvious.

Consider claim 24, **Burgess, Jr. et al (U.S. Patent # 6,449,694)** clearly disclose and show a system for saving power as described.

However, Burgess, Jr, et al., fails to disclose the storing a partial address in a PHY layer of a station, the partial address associated with a subset of the stations' own MAC address; receiving a data frame in the PHY layer, the data frame containing a partial address in a PHY layer header portion thereof; determining whether the partial address of the received data frame matches the partial address stored in the PHY layer of the station; and rejecting the data frame if the partial addresses do not match.

Therefore claim 18 is considered novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
